
Peter Laurinec

Curriculum Vitæ

Education

2014 – present **PhD. Study in Intelligent Information Systems**, *Faculty of Informatics and Information Technologies, Slovak University of Technology*, Bratislava.

2012 – 2014 **Mgr. in Probability and Mathematical Statistics**, *Faculty of Mathematics, Physics and Informatics, Comenius University*, Bratislava.

2009 – 2012 **Bc. in Insurance mathematics**, *Faculty of Mathematics, Physics and Informatics, Comenius University*, Bratislava.

Bachelor's thesis

title *Latin squares and theirs usage in design of experiments (in Slovak)*

supervisor Alena Bachratá

description I created a model of analysis of variance, if we use Latin square for design of experiment. Analysis of variance with usage of Latin squares can be used for example in agriculture for better planning.

Master's thesis

title *Model-based cluster analysis (in Slovak)*

supervisor Radoslav Harman

description The diploma thesis deals with the model-based Gaussian clustering. I have derived and proposed six optimization criteria for the creation of clusters. Optimization problem was solved by using a generalization of the binary genetic algorithm. Cluster analysis can be used to increase the marketability of products, searching for brain tumors or image segmentation.

Dissertation's thesis

title *Intelligent Analysis and Mining Big Distributed Data (in Slovak)*

supervisor Mária Lucká

Vodná Ul. 2927/27 – 945 01 Komárno – Slovakia

www2.fiit.stuba.sk/ laurinec/

description My research deals with the cluster analysis and its development and adaptation to big data. I analyze methods that effectively handle large volumes of data and data streams. I see the application in the domain of energy and smart grids. The area is interesting to examine from the perspective of sustainable sources of energy, economy and environment.

Experience

2016 **Instructor of Artificial Intelligence**, *FIIT STU*, Bratislava.

2014 – 2016 **Instructor of Procedural Programming**, *FIIT STU*, Bratislava.

May 2015 – September 2015 **Consultant - part-time job**, *Atos IT solutions*, Bratislava.
Work on project which dealt with electrical energy consumption and smart grid.

2012 – 2015 **Tutor of mathematics and statistics**, Bratislava.
I have tutored university students in fields of mathematics and statistics.

summer of 2011 **Administrative work**, *ALL PROF Slovakia*, Bratislava.
Scanning and controlling of personal documents.

Languages

Slovak **Native speaker**

Czech **Advanced**

Hungarian **Advanced**

English **Intermediate**

Computer skills

R Advanced

LaTeX Advanced

MS Office Advanced

C Intermediate

Linux Intermediate

MySQL Intermediate

Other skills

Driving licence Type B

Interests

Statistics Data analysis, data mining, machine learning, artificial intelligence, data science, clustering, big data

Sport Soccer, cycling, badminton, squash, running, ultra trail, yoga

Other Hiking, fishing, music, movies, traveling
